MOVE BY MOBILIFY

Empowers confidence and independence while ensuring safety in the mobility of elderly people.

Mobility Improvement
Support for lifting the legs to move easily and avoid fatigueness

Move Careless
Airbag protection system to prevent injuries when falling

Emergency Call
Notification chain up to emergency call via SMS after a fall has been detected

MOBILIFY

GoRide provides a safe and affordable way to stay mobile

Affordable Micromobility Service

Our Solution for the specified problem, is a micromobility service, consisting of an innovative three-wheeled scooter design and a simple application to interact with the scooters.
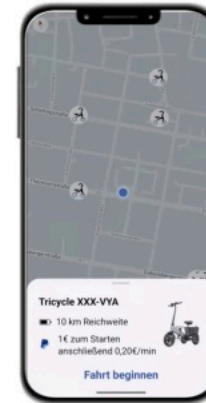

Elderly-friendly Scooter Design

Our three-wheeled scooter design reduces the risk of tipping over and eliminates the need of balancing while riding, making it suitable for elderly people to use. The acceleration profile and the ergonomics of the scooter are specifically designed for safety and comfort.

Simple & Intuitive Application

Elderly people have specific challenges when it comes to app usage (e.g. text too small, screen is overloaded with information). Our application addresses these issues directly.

Scooter Prototype V1
covers stability, seating, and safety features

App Prototype V1
covers scooter locating and scooter unlocking

Meet AKTIVÄLTER

We have created a WhatsApp bot that allows seniors to chat and discover activities suited to their interests and nearby locations. It's like chatting with a friend, in the friendliest and easiest way.

Our seniors are familiar with WhatsApp and don't want to learn how to navigate through new apps. AktivÄlter offers an easy, personalized solution that promotes mobility and reduces the time they spend alone at home.

- Personalized Event Recommendations
- Enriched Social Interaction
- Individualized Navigation Guidance
- Increased Mobility: Promotes physical activity, provides personalized traffic info, and simplifies navigation.

TECAGE

Caregiver Integration
Caregivers can easily input all necessary information and preferred locations through a dedicated app

Personalized Travel Recommendations
With just one click on the icon of their desired location, seniors receive navigation information and preferred transport options tailored to their needs

User-Friendly Interface
Access reliable and easy-to-use travel information without needing prior technical knowledge

App for family and caregiver
